BARN DOOR SIZING TABLE

STAINLESS STEEL SERIES SINGLE-DOOR CONFIGURATIONS

In a single-door configuration, we recommend that the total door width be at least 1 inch wider than the finished opening. The nominal* track length should be double the door width. Use the table below to match the recommended maximum opening width with the corresponding door panel width and track length. The far right column indicates the minimum necessary hardware and the catalog number of the appropriate Stainless Steel Series track.

door width	maximum finished opening width	nominal* track length	minimum Stainless Steel Series hardware required†
1'6"	17"	3'0"	hardware set of your choice, track 6005T4, request a custom cut to the correct length
1'8"	19"	3'4"	hardware set of your choice, track 6005T4, request a custom cut to the correct length
